GLADIOLI

¶ Our old friends and customers well know that we have been identified very closely with GLADIOLI for many years, and we have seen this special industry grow from a few Acres of a few varieties to many Acres and many varieties of our own cultivation, and during this time many competitors have come into the field, so that now the growing of Gladioli is an industry that touches nearly all parts of the world.

	Doz.	100	1000
Niagara—Ch. Banning—In type the variety resembles "America," but the flowers appear to be somewhat larger, measuring 4½ inches across. In color the flowers are a delightful cream shade with the two lower inside petals or segments blending to canary yellow. The throat is splashed with carmine, and the lower ends of the outside petals are also blushed with carmine. The stamens are purple and the stigmas pale carmine, this little addition in the coloring relieving the creamy effect of the petals. The flower spike is very erect and stout and is wrapped with broad, dark green foliage. The variety is evidently destined to lead in the cream colored varieties, in fact it would seem to be in a class all by itself	1 50	12 00	100 00

Gladioli in Mixture.

We build our mixtures to order, as we believe this is the only way a true mixture can be kept up to standard. We know perfectly well that mixtures can be bought at almost any price, but after testing most mixtures on the market we have come to the conclusion that our customers want and should have something better than the average. So we build our mixtures from named varieties and seedlings of merit.

Regarding our mixtures under color, we are most careful to have them absolutely true and pure, in fact, as well as in name; and they are mixed with great care from named sorts.

OUR GUARANTY

We are so very anxious to give our customers satisfaction, and we are so very sure that we have satisfactory goods, that we stand ready to "make good" by replacing anything that does not turn out as represented, from any fault of ours.

OUR PRICES

We plan our prices to cover cost of production and cost of handling and selling which items have advanced considerably during the past five years in keeping with all other products.

In view of this we have been obliged to advance prices in some cases from time to time. We never lower the standard of bulbs, not even to meet competition.

SPECIAL

In order to keep our stock "up to date" we make extensive trials of all varieties put on the market; some are very fine but slow producers, some fine but not strong enough in constitution for commercial purposes, some are good but too similar to varieties already on the market.

As a result of these trials we have concluded to put the stocks of these trial lots together and offer them as the

Flowerfield Trial Mixture.

In this you are apt to get some very fine things.

LYCORIS SQUAMIGERA

or

AMARYLLIS HALLII

A perfectly hardy Amaryllis producing beautiful pink flowers.

Description—Lycoris Squamigera produces in early spring attractive green foliage which grows until July when it ripens off and disappears, and one not familiar with its habits would think the bulb had died, but about a month later as if by magic the flower stalks spring from the ground to a height of two or three feet, developing an umbel of large and beautiful lily-shaped flowers 3 to 4 inches across and from 8 to 12 in number, of a delicate lilac pink shaded with clear blue.

Culture—As the bulb is perfectly hardy without any protection it can be planted either in the Fall or Spring but we consider Fall the best time as the bulbs will have a chance to get established before flowering time. Cover the crown about 4 inches.

Very useful for the border or among shrubbery.

Price for strong blooming bulbs $1.00 Per doz. $7.50 per 100. $70.00 per 1000.
